John Heathershaw,Edward Schatz

From Pythagoras to Einstein Kurt Otto Friedrichs,1965

Paradox of Power John Heathershaw,Edward Schatz,2017 State weakness is seen to be a widespread problem throughout Central Asia and other parts of postsocialist space, and more broadly in areas of the developing world. Challenging the widespread assumption that these weak states inevitably slide toward failure, Paradox of Power takes careful stock of the varied experiences of Eurasian states to reveal a wide array of surprising outcomes. The case studies show how states teeter but do not collapse, provide public goods against all odds, interact with societies in creative ways, utilize coercion effectively against internal opponents, and establish practices that are far more durable than the language of weakness would allow. While deepening our understanding of the phenomenon in Eurasia in particular, the essays also contribute to more general theories of state weakness.

Proof and Other Dilemmas Bonnie Gold,Roger A. Simons,2008 For the majority of the twentieth century, philosophers of mathematics focused their attention on foundational questions. However, in the last quarter of the century they began to return to basics, and two new schools of thought were created: social constructivism and structuralism. The advent of the computer also led to proofs and development of mathematics assisted by computer, and to questions concerning the role of the computer in mathematics. This book of sixteen original essays is the first to explore this range of new developments in the philosophy of mathematics, in a language accessible to mathematicians. Approximately half the essays were written by mathematicians, and consider questions that philosophers have not yet discussed. The other half, written by philosophers of mathematics, summarise the discussion in that community during the last 35 years. A connection is made in each case to issues relevant to the teaching of mathematics.

Payforward Networking Andrew Hennigan,2015-09-24 Without an effective network it is much harder to get a job, find business, influence people and much more. Most people are aware of this, but are not so sure how to go about building, maintaining and using a network. Payforward Networking is for these people. Based on the networking workshops taught for many years by communication consultant Andrew Hennigan in business schools and companies, it presents a simple, methodical approach to networking that is both effective and easy to master. At the same time it is also built on ethical white hat methods that will not make you feel uncomfortable or manipulative. The book covers the basics of networking in real-life

and online, the essentials of online reputation management, the impact of culture on networking, strategic networking and much more.

21 Proms David Levithan, Daniel Ehrenhaft, 2015-09-03 Sometimes the night of your dreams can be a total nightmare. Here, 21 of the funniest, most imaginative writers today create their own kind of prom stories. Some are triumphs. Some are disasters. But each one is a night you'll never forget.

Young People and the Labour Market National Economic Development Office, 1988

Euler's Gem David Richeson, 2012 Leonhard Euler's polyhedron formula describes the structure of many objects--from soccer balls and gemstones to Buckminster Fuller's buildings and giant all-carbon molecules. Yet Euler's formula is so simple it can be explained to a child. Euler's Gem tells the illuminating story of this indispensable mathematical idea. From ancient Greek geometry to today's cutting-edge research, Euler's Gem celebrates the discovery of Euler's beloved polyhedron formula and its far-reaching impact on topology, the study of shapes. In 1750, Euler observed that any polyhedron composed of V vertices, E edges, and F faces satisfies the equation $V - E + F = 2$. David Richeson tells how the Greeks missed the formula entirely; how Descartes almost discovered it but fell short; how nineteenth-century mathematicians widened the formula's scope in ways that Euler never envisioned by adapting it for use with doughnut shapes, smooth surfaces, and higher dimensional shapes; and how twentieth-century mathematicians discovered that every shape has its own Euler's formula. Using wonderful examples and numerous illustrations, Richeson presents the formula's many elegant and unexpected applications, such as showing why there is always some windless spot on earth, how to measure the acreage of a tree farm by counting trees, and how many crayons are needed to color any map. Filled with a who's who of brilliant mathematicians who questioned, refined, and contributed to a remarkable theorem's development, Euler's Gem will fascinate every mathematics enthusiast.

Short stories for children. By Charlotte Elizabeth Charlotte Elizabeth Tonna, 1852

Study Lists, Chronological Tables, and Maps to Accompany An Introduction to English Literature Henry Spackman Pancoast, 1908

I Murdered Your Mother, I Think? Robert Beckstedt, 2018-11-30 Maria the nurse and nanny - invoking Haitian Voodoo to protect those she loves from her damaged, violent sister Andrea. And Michael - the wealthy man between them, fighting desperately to save his baby son and escape with the sister he truly loves. This exhilarating saga of love and revenge sweeps us from Hispaniola in 1916, where the sisters' family originated in poverty and slavery, to the lurking drug culture of Balboa, Panama, and finally, to the United States. The ripples of the sisters' family history spread insidiously and threaten all that Michael has built. Will the Voodoo that was meant to protect save them? Or will it finally bring disaster upon Michael, Maria, and everything they love?

Women in the Sun, Linen in the Wind María Claudia Otsubo, 2018-10-30 These fifteen short stories dive deeply into reality looking to pull out new senses. They have the ability to show - especially what cannot be told. Tales of the feminine world, the natural world and of freedom (or the lack of it) open up the blinds to let us see beyond everyday's acts and wordly rites; to let us see beyond words and gestures.

Fist of the Blue Sky Nobu Horie, Buronson, 2004-03 It is just before World War II and Kasumi Kenshiro hides as a quiet, absent-minded professor teaching literature at a small women's college in Tokyo. Once the 62nd Grand Master of Kohuto Shinken, God Fist of the North Star, and known as Yan Wang, or the king of Death who preserved the peace in the City of Devils, a fighter of thugs and drug dealers, Kasumi now seeks anonymity and a quiet life until the death of his lover, and former brothers, forces him to return to Shanghai to fulfill his destiny and avenge the deaths of his associates.

In and Out of Hollywood Charles Higham, 2009-10-27 As a best-selling biographer of numerous Hollywood greats—Katharine Hepburn, Bette Davis, Errol Flynn, Howard Hughes, and Cary Grant among them—Charles Higham has been privy to the public and private joys, tragedies, scandals, and desires of many of the darlings of Hollywood's red carpet. *In and Out of Hollywood* is Higham's own life story, replete with a vibrant cast that includes stars from Marlene Dietrich to Clint Eastwood to Leonardo DiCaprio. Born into a life of privilege in 1930s England, Higham endured a difficult childhood. To escape a tortured family situation, Higham married early despite his awakening homosexuality and fled to Australia with his wife to begin a new life as a poet, journalist, and editor. By the 1960s he had settled in Hollywood. It was here that he struck gold by finding and writing about the reels of Orson Welles's legendary unfinished Latin American epic film *It's All True*, long thought lost in a Paramount vault. This momentous find rocketed Higham to the A-list. He soon became a *New York Times* feature writer and sought-after biographer lauded for his pioneering style. *In and Out of Hollywood* contains Higham's personal reflections on the stars he has known over the past forty years. From his insider perch he reveals Hollywood's inner life: how Bette Davis influenced the death of her second husband; how Walt Disney's dark vision devolved into bright animated features he astonishingly despised; how leading actors clandestinely participated in gay activities. Higham's memoir also charts his work as a political commentator, historian, poet, and playwright; describes the dangers and excitements of gay life before AIDS; and recounts his eventual discovery of a lasting relationship. *In and Out of Hollywood* is a lively tour through several decades of changing times and personalities behind the scenes of the American film world.

eBay For Dummies Marsha Collier, 2004 eBay is the world's #1 online shopping destination and can be a bit intimidating for first-time users. Thankfully, though, the latest edition of *eBay For Dummies* addresses all the issues a first-time or inexperienced eBay user will confront. Readers will be up to date in no time on the latest changes in the eBay interface, fee structure, and methods for buying and selling. Readers will quickly be on the path that makes bidding, buying, and selling the fun it should be! A Reference for the Rest of Us! Author Marsha Collier is a recognized eBay expert, thanks to

her bestselling books, appearances as an instructor at eBay University events, and appearances on NBC's Today Show, ABC's The View, and numerous print and radio interviews Topics include: getting a user name, making first bids, completing transactions, selling items, and what to do if anything goes wrong An ideal resource for everyone from corporate customers to mom & pop retailers, as well as individuals who are cleaning out their closets and garages

Inventing Public Diplomacy Wilson P. Dizard, 2004 Public diplomacy - the uncertain art of winning public support abroad for one's government and its foreign policies - constitutes a critical instrument of U.S. policy in the wake of the Bush administration's recent military interventions and its renunciation of widely accepted international accords. Wilson Dizard Jr. offers the first comprehensive account of public diplomacy's evolution within the U.S. foreign policy establishment, ranging from World War II to the present. Dizard focuses on the U.S. Information Agency and its precursor, the Office of War Information. Tracing the political ups and downs determining the agency's trajectory, he highlights its instrumental role in creating the policy and programs underpinning today's public diplomacy, as well as the people involved. The USIA was shut down in 1999, but it left an important legacy of what works and what doesn't in presenting U.S. policies and values to the rest of the world. Inventing Public Diplomacy is an unparalleled history of U.S. efforts at organized international propaganda.
